Programming Assignment: Apache SystemML

You have not submitted. You must earn 1/1 points to pass.

Deadline   Pass this assignment by November 11, 10:59 PM PST

Instructions

My submission

Discussions

In this assignment we just want you to write one line of SystemML DML code and scale it on top of Apache Spark - just that you get an idea on how scaling of linear algebra operations are working

Please import the following notebook into IBM Data Science Experience and follow the steps

https://raw.githubusercontent.com/IBM/coursera/master/coursera_ai/AssignmentSystemML.ipynb

In case you need a refresher on how this is done, please check out these instructions:

https://github.com/IBM/coursera/wiki/Environment-Setup

Especially the one with the title

"Setup Watson Studio with Spark 2.1 (not 2.3!)"

How to submit
Copy the token below and run the submission script included in the assignment download. When prompted, use your email address **gpudja@gmail.com**.

Generate new token

Your submission token is unique to you and should not be shared with anyone. You may submit as many times as you like.
